

Civil Service and Others Pension Scheme (CSOPS)

Addendum to GAD guidance note: "Factors for Added Pension for alpha members"
dated 29 June 2015

Date: 4 April 2016

Authors: Sandra Bell and Steve Lewis

1 Introduction

- 1.1 This note is addressed to The Pension Scheme Executive (TPSE) of the Cabinet Office as the scheme manager of the CSOPS.
- 1.2 This note is an addendum to the GAD guidance note "Factors for Added Pension for alpha members" dated 29 June 2015 ("the Guidance Note"), and it is essential that this addendum is read in conjunction with the Guidance Note.
- 1.3 The purpose of this addendum is to provide new tables of factors to replace those in Appendix A of the Guidance Note. The new tables of factors are set out in Appendix A of this note. Please note that only the Added Pension by Lump Sum factors (tables 1 to 4) have been updated, but we have included all of the tables in the appendix for completeness.
- 1.4 The implementation date of the new factors is 16 March 2016. The factors in this addendum are effective from the implementation date.
- 1.5 The new factors provided in this addendum are in the same format as those in the previous Guidance Note.
- 1.6 Please note that the examples in the Guidance Note have not been updated for the new factors in this addendum. However the examples in the Guidance Note can still be referred to for the method to calculate the benefit applicable.
- 1.7 Please contact Brian Allan on (020 7211 2629) for further information on this addendum.

Appendix A: List of new factor tables

- > Table 1: P2APLS65 – Alpha Added Pension by Lump Sum factors for normal pension age of 65
- > Table 2: P2APLS66 – Alpha Added Pension by Lump Sum factors for normal pension age of 66
- > Table 3: P2APLS67 – Alpha Added Pension by Lump Sum factors for normal pension age of 67
- > Table 4: P2APLS68 – Alpha Added Pension by Lump Sum factors for normal pension age of 68
- > Table 5: P2APPC65 – Alpha Added Pension by Periodical Contribution factors for normal pension age of 65
- > Table 6: P2APPC66 – Alpha Added Pension by Periodical Contribution factors for normal pension age of 66
- > Table 7: P2APPC67 – Alpha Added Pension by Periodical Contribution factors for normal pension age of 67
- > Table 8: P2APPC68 – Alpha Added Pension by Periodical Contribution factors for normal pension age of 68
- > Table 9: P2APREVAL – Alpha Added Pension Revaluation factors

Table 1: P2APLS65 – Alpha Added Pension by Lump Sum factors for normal pension age of 65 – [factors effective from 16 March 2016]

	Males	Females	Unisex
Age	Member's pension factor	Member's pension factor	Member + spouse
16	1.83	1.94	2.00
17	1.92	2.03	2.09
18	2.01	2.13	2.19
19	2.10	2.22	2.30
20	2.21	2.33	2.40
21	2.32	2.44	2.52
22	2.42	2.56	2.63
23	2.54	2.68	2.76
24	2.65	2.80	2.90
25	2.78	2.94	3.03
26	2.91	3.08	3.17
